---

YOU ARE CORDIALLY INVITED to visit our Gardens where over 500 varieties of named Iris and thousands of new seedlings are growing. Our peak bloom is usually during the last week of May.

We will be happy to assist you in making your selection, or to answer any questions. Please feel free to write us.

'Our Iris are replanted each year—assuring you of healthy, husky rhizomes from one year plants.

We wish to take this opportunity to thank you for your orders which have helped our "Garden to Grow"! We hope your garden will display great beauty this season, and that each new variety will meet with your expectations—

## **OUR INTRODUCTION FOR 1955 —**

**MISSION MELODY** (Hamblen) Early-Midseason. (Cherie x Floradora). A rosy orchid-pink self of excellent form and substance. The blossoms are large with flaring and ruffled falls, nicely placed on tall, well-branched stalks .....\$10.00

WE ARE VERY PROUD AND HAPPY TO BE GROWING SEVERAL "GUEST IRIS"  
FOR TELL MUHLESTEIN, SOME OF WHICH ARE THESE — 1955 INTRODUCTIONS

**BILL BROWN** (Muhlestein) Early-Mid-season (Veisha x Casa Morena) x (Casa Morena x Tobacco Road) "The largest coppery-brown iris I have grown and a very smoothly finished self it is." No. 49-40A. Height 38 inches .....\$10.00

**GOLDEN CORONA** (Crosby) Midseason (Lancaster x Daybreak) x (Pink Formal) Yellow standards, white falls bordered yellow. The yellow is very bright—the white very clean, giving the wide, somewhat waved, flowers a smart and charming personality. Height 36 inches. Net.....\$15.00

**GOLD TORCH** (Muhlestein) Midseason —Very Late (Matula x Gold Ruffles) x ((Ola Kala) x (Golden Majesty x Spun Gold)) A brilliant deep yellow to help extend the iris season. In the same color-range as Solid Gold. Flower shape leaves something to be desired, but with such a pedigree it should be a wonderful parent for rich color and ruffling. Wonderful grower and increaser. No. 51-87 .....5.00

**PRAISEWORTHY** (Muhlestein) Mid-season-Late (Sky Song x Blue Rhythm) "I have looked on this as a near-powder-blue, however, other experts seem to think it has some violet in it. The flaring falls are the same color as the standards, the beard yellow. A remarkable flower of all-over quality and different to any other blue iris I have seen." H.C. '54. No. 51-22A. Net .....\$10.00

**QUEEN'S LACE** (Muhlestein) Mid-season-Late (Clara B) x (Gold Ruffles x Chantilly) Creamy-white done up

with the heaviest laced edge—so laced, in fact, it is often difficult for the standards and falls to let go of each other so the flower may open. The edges of the petals, the hafts and the beard are light yellow. A very novel personality. H. C. '54. Net.....\$25.00

**SWAN BALLET** (Muhlestein) Mid-season-Late (Spanish Peaks x Faught 19H, or an Azure Skies x (Stella Polaris x Easter Morn) Altho Tell's records show that this is a Faught 19H seedling, the flower is very like the Azure Skies seedling—and he thinks a stray grain of pollen from the second listed, may have been on the tweezers. In any event this is a very beautiful, slightly ruffled, white with a white beard. The falls are very round and flare horizontally, have a little ruffling and a great amount of substance. H.C. '54. Limited stock. Net .....\$25.00

**UTAH SKY** (Muhlestein) Early-Mid-season (Sky Song x Gracious Lady) "Cornflower blue that is one of the bluest blues I have seen. The very wide falls have a bit of ruffling at the hafts that give it distinction. Won the Blue class at the U.I.S. 1953 Show." H.C. '54. Net .....\$15.00

**WHITE FLAMINGO** (Muhlestein) Mid-season-Late (Hall's 44-55 x Pink Salmon) As the name implies this is a white with a flamingo-tangerine beard. The flower is large, the falls wide and full and somewhat down-hanging. Height 36 inches.  
No. 48-25H. .....5.00

Order above Iris from Tell's Iris Gardens — 691 8th North, Provo, Utah.  
Send for his Hybridizers' Catalog and Handbook (25c — deductible with first order.)

## IRIS TERMS

Self: Same solid color in both standards and falls.

Blend: Colors combined or blended in both standards and falls.

Bi-Color: Lighter standards with deeper toned falls.

Plicata: Stitched or stippled color on white or yellow flower.

Amoena: White or tinted white standards and colored falls.

Variegata: Yellow standards and falls or purple or red.

## **TERMS OF SALE**

Mail orders — cash please — check or money order. All orders of \$5.00 or more will be prepaid, on smaller orders add 35c for postage.

Local Customers — thirty percent of sale will hold the order and you will be notified by mail when your Iris are ready.

## **SHIPPING DATES**

Iris will be shipped from June 15th to October 1st. Early planting will allow your plants to obtain a full summer's growth. We have found that early planting produces more bloom and larger plants.

Orders will be filled in rotation, however, we will comply with requests for special shipping dates if possible.

## **GUARANTEE**

**GUARANTEE** — All Iris true to name, free from disease and guaranteed to live and grow for you.

## **EXTRAS — CHOOSE YOUR OWN — EXTRAS**

On orders \$5.00 to \$10.00 .....Select 30% more Iris Value

On orders \$10.00 or more .....Select 50% more Iris Value

This offer does not include varieties marked Net.

## **JOIN THE AMERICAN IRIS SOCIETY**

You will receive 4 valuable Bulletins each year, containing information on iris culture, suggestions to hybridizers and many other helps.

Dues are \$4.00 per year. Mail check to:

### **THE AMERICAN IRIS SOCIETY**

**3902 Hillsboro Road**

**Nashville 12, Tennessee**

## **DYKES MEDAL WINNERS**

The Dykes Medal is the highest award an Iris can receive. To be eligible an Iris must have first received Honorable Mention (HM) and also the Award of Merit (AM) from the American Iris Society.

## **SEE THEM IN OUR GARDEN**

1935—Sierra Blue

1951—Cherie  
1952—Argus Pheasant  
1953—Truly Yours  
1954—Mary Randall

## SPECIAL INTRODUCTORY OFFER

To acquaint new customers with our high quality Rhizomes we are offering an added bonus. In addition to the "extra Iris" described in the catalog, you may, on orders of \$10.00 and above, select an additional 25% Iris value! For example: a \$10.00 order entitles you to 75% extra value — or \$17.50 worth of Iris — a \$20.00 order entitles you to \$35.00 worth of Iris, etc.

We do not make substitutions unless requested to do so, however, we would appreciate an alternate list of "extras" in case we are sold out of the variety you choose.

We guarantee complete satisfaction.

**DISTANCE APART:** This will depend on your particular plans. Generally iris are planted from 14" to 2' apart. If you desire immediate clump effect plant 8" apart in groups of 3 or more of one variety. You may have to divide and separate your plantings more often, but you will have a wonderful splash of color sooner than you would if you planted only one rhizome of one variety.

**FERTILIZATION.** Iris will thrive without feeding but will respond to its application. In the matter of fertilizers, garden sense should be used in liberal quantity. In the preparation of your new Iris bed, spade in a good application of compost below the roots. Then an application of a well balanced fertilizer applied as a top dressing dusted around and in between the plants in early spring or very late fall is desirable. Steamed bone meal and super-phosphate are fine top dressing materials.

**CULTIVATING.** Do it shallowly. Iris feeding roots are very near the surface. Keep your Iris free of weeds and do not allow neighboring plants to encroach upon them. Remember, they should have sunlight right down to the rhizome. Remove the outer leaves as they begin to brown. At all times keep litter, old Iris leaves, grasses, etc., away from the rhizomes. Clean cultivation is the finest precaution for Iris troubles.

## **TERMS OF SALE**

Mail orders — cash please — check or money order. All orders of \$5.00 or more will be prepaid, on smaller orders add 35c for postage.

Local Customers — thirty percent of sale will hold the order and you will be no

1953—Truly Yours  
1954—Mary Randall

## IRIS PLANTING AND CULTURAL DIRECTIONS

**WHEN TO PLANT.** For best results plant June through September. Early planting establishes the new Iris plants before winter. This is the time to reset clumps of Iris that are crowded, generally clumps 3 to 4 years old.

**WHERE TO PLANT.** The ideal location for your Iris is a sunny, well drained position. Sunshine at a minimum half days; Iris will not do well in the deep shade. No water should stand in your Iris beds. Raise beds slightly above the level of your garden paths if necessary.

**DEPTH TO PLANT.** Place your rhizomes just below the surface of the ground with the roots well spread out underneath so the rhizome is within reach of the warmth of the sun's rays while the roots beneath are in moist (not soggy) soil. Be sure to firm the soil tightly around each rhizome when planting. Follow ordinary good garden practice of watering and settling soil on newly set plants, of course.

**DISTANCE APART:** This will depend on your particular plans. Generally iris are planted from 14" to 2' apart. If you desire immediate clump effect plant 8" apart in groups of 3 or more of one variety. You may have to divide and separate your plantings more often, but you will have a wonderful splash of color sooner than you would if you planted only one rhizome of one variety.

**FERTILIZATION.** Iris will thrive without feeding but will respond to its application. In the matter of fertilizers, garden sense should be used in liberal quantity. In the preparation of your new Iris bed, spade in a good application of compost below the roots. Then an application of a well balanced fertilizer applied as a top dressing dusted around and in between the plants in early spring or very late fall is desirable. Steamed bone meal and super-phosphate are fine top dressing materials.

**CULTIVATING.** Do it shallowly. Iris feeding roots are very near the surface. Keep your Iris free of weeds and do not allow neighboring plants to encroach upon them. Remember, they should have sunlight right down to the rhizome. Remove the outer leaves as they begin to brown. At all times keep litter, old Iris leaves, grasses, etc., away from the rhizomes. Clean cultivation is the finest precaution for Iris troubles.
